

AWS Trainings

Your path to becoming an AWS Cloud Professional

qSkills: Authorized AWS Training Partner

Our AWS trainings provide you with the necessary know-how to develop, deploy and operate IT solutions in the AWS cloud in a well-founded and goal-oriented manner.

With our trainings, you can prepare for AWS certifications at its best.

The training courses are designed by AWS experts, regularly updated and held by authorized trainers.

So you can be sure that learning content is current and your cloud skills are always up to date.

+ *Your choice:*

Participate online, hybrid or on-site.

+ *Your planning reliability:*

Already from **2 participants** our trainings take place for you.

About qSkills

qSkills is one of the leading independent training providers in the field of IT and information security. More than 170 experts impart exactly the knowledge that is required in the digitalized working world.

Professional didactics, hands-on training environments and appreciation for our participants are the essence of our brand.

As a qualification expert, we have been offering high-quality training and industry-specific certifications since 2002. We support our customers in defining competence requirements and work with them to develop continuing education concepts and role-based qualification paths.

Our main topics include IT infrastructure and cloud technologies, DevOps and secure software, Industry 4.0 and cyber security, artificial intelligence, and management systems and compliance.

We offer open courses and in-house training in all formats. Our headquarters are located in Nuremberg.
